Cool spin on a dungeon crawler if you can even call it that. More like a beat em up almost. Graphics are kinda \u2665\u2665\u2665\u2665\u2665 but they have some charm. Unfortunately it has too many bugs to recommend.. I like what I see, but I am unsure if this game is working properly. The Xbox controller does not work, and, the Steam Link controller, nor keyboard work during the "Challenges" It says to press "K" and the "X" button, and I do, but nothing is happening. It does not shoot, or do anything but flash when I press it. Not sure if this means I have to come back to this level again to do the Challenge, but I find it odd to believe that this would be required to do nearly the moment you start the game. Very sad this is happening, because this does look like a fun game. I just wish that "full controller support" meant "full controller support". For games where you play a chef I'll take burgertime over this any day. The idea and story are pretty good but the controls are really awkward.

The graphics are all over the place. Some characters and environments are really nice and others look like they are from a first generation iPhone game.
